

PERSONAL PORTFOLIO BALANCED FUND

Medium Risk – Share Class 3 Accumulation

as at 31 January 2024

Investment Objective

The Fund aims to provide an increase in capital value over the long term (5 years or more). The Fund will invest, directly and indirectly, at least 45% in higher risk assets, such as UK and overseas shares and up to 55% in lower risk assets, such as UK and overseas bonds. The Fund will do this by investing indirectly via regulated collective investment schemes or exchange-traded products including investment trusts and exchange-traded funds and directly in bonds and shares with allocations determined by the Investment Manager. The Investment Manager will invest at least 50% of the Fund's portfolio in investments in companies that are credibly committed to achieving net zero greenhouse gas emissions by 2050 (a "Net Zero Trajectory"). More information about what the Investment Manager considers to be a credible commitment to a Net Zero Trajectory can be found in the Environmental, Social and Governance (ESG) Policy on the website (www.coutts.com/wealth-management/specialist-planning-services/responsible-investing/disclosure-and-policies.html).

The Fund's level of exposure to different asset classes will typically be in line with the benchmark weightings. The Benchmark has been created by the Investment Manager to constrain the level of risk of the Fund. The Investment Manager chooses the assets held by the Fund considering the Benchmark weights and indices and manage the Fund within a tracking error of 2%. Tracking error measures the extent to which the Fund's performance differs from the Benchmark.

Fund Manager Comments

- This is a multi asset fund, with an active asset allocation implemented via passive funds and UK gilts (no alternative assets or themes).
- The Fund's level of exposure to different asset classes will typically be in line with the benchmark. The Fund will be managed relative to, and therefore be constrained by the Benchmark.
- The Investment Manager will manage the risk profile of the Fund via divergence from the Benchmark within a Tracking Error of 2%.

Asset Breakdown

Geography

The fund is actively managed, which means the Investment Manager makes the decisions about how to invest the Fund's money, therefore the above data is expected to change over time. Please note that the breakdown shown is for illustrative purposes only and is accurate as at the date of publication. As such, the percentage invested in the different asset classes at other dates may differ considerably from those detailed in this factsheet. As a result of rounding, the figures may not add up to 100%.

We publish an indicative NAV (an estimate of the value of the fund’s assets) on the last working day of each year due to this being a half day on the London Stock Exchange.

³Performance figures are derived from the Fund net asset values (NAV) and are quoted net of all fees paid from within the fund.

Important Information

The value of investments and any income from them, can go down as well as up, and you may not recover the amount of your original investment. There is no guarantee that the investment objective will be achieved. Where an investment involves exposure to a foreign currency, changes in rates of exchange may cause the value of the investment, and the income from it, to go up or down. In the case of some investments, they may be illiquid and there may be no recognised market for them and it may therefore be difficult for you to deal in them or obtain reliable information about their value or the extent of the risks to which they are exposed. Investments in emerging markets are subject to certain special risks, which include, for example, a certain degree of political instability, relatively unpredictable financial market trends and economic growth patterns, a financial market that is still in the development stage and a weak economy.
